

## Manuscript Presentation

1. Only original papers will be considered, and the author(s) must provide assurance that the paper has not been published, or submitted for publication, elsewhere.
2. Name, affiliation, and full address of the author(s) including address for correspondence should be stated on the title page.
3. An abstract should be included with papers which should be concise, indicate both the objectives and results of the research, and be a complete statement in itself.
4. In addition, 3–5 key words should be supplied, for use in indexing.
5. No formal limit is set for the length of a paper, but the editors may recommend condensation where appropriate.
6. SI units should be adopted throughout the manuscript. All symbols should be clearly identified on the manuscript to avoid confusion in typesetting. If considered useful, a nomenclature can be included.

Authors will be asked, upon acceptance of an article, to transfer copyright of the article to the publisher. This will ensure the widest possible dissemination of information under copyright laws.

### **Electronic figures**

Electronic versions of your figures must be supplied. For vector graphics, EPS is the preferred format. For bitmapped graphics, TIFF is the preferred format.

The following resolutions are optimal:

- line figures - 600 - 1200 dpi
- photographs - 300 dpi
- screen dumps - leave as is
- 

Colour figures can be submitted in the RGB colour system. Font-related problems can be avoided by using standard fonts such as Times Roman, Courier and Helvetica.

### **Colour Figures**

Colour figures may be printed at the author's expense. Please indicate at submission which figures should be printed in colour, the number of colour pages you prefer and to which address we can send the invoice. In addition, please specify if figures are to appear together on a colour page.

### **Language**

We appreciate any efforts that you make to ensure that the language is corrected before submission. This will greatly improve the legibility of your paper if English is not your first language.

### **Footnotes**

Footnotes should be kept to an absolute minimum and used only when essential.

### **Formulae**

Formulae should be type-written whenever possible. Alternatively, a fine drawing pen and black ink should be used. It is extremely important that all mathematical symbols and letters used are

identified and listed and that the required style of appearance of such symbols is clearly indicated, e.g., bold face, italics, script, outline, fraktur, etc. Sub- and superscript should be clearly indicated where confusion might arise. Use a full stop as a decimal sign. Identify in the margin any symbols that might be confused with similar symbols, e.g., letter l and figure 1, capital letter O and figure 0, letter e, epsilon, and element sign, etc.

### **Figures**

All photographs, graphs and diagrams should be referred to as a 'Figure' and they should be numbered consecutively (1, 2, etc.). Multi-part figures ought to be labelled with lower case letters (a, b, etc.). Please insert keys and scale bars directly in the figures. Relatively small text and great variation in text sizes within figures should be avoided as figures are often reduced in size. Figures may be sized to fit approximately within the column(s) of the journal. Provide a detailed legend (without abbreviations) to each figure, refer to the figure in the text and note its approximate location in the margin. Please place the legends in the manuscript after the references.

### **Tables**

Tables, which should be typed on separate sheets, must be numbered consecutively with roman numerals and have titles. They should be prepared in such a manner that no break is necessary. The use of vertical lines in tables is strongly discouraged.

The approximate required locations of the tables should be indicated in the left-hand margin of the manuscript.

Each table should be numbered consecutively (1, 2, etc.). In tables, footnotes are preferable to long explanatory material in either the heading or body of the table. Such explanatory footnotes, identified by superscript letters, should be placed immediately below the table. Please provide a caption (without abbreviations) to each table, refer to the table in the text and note its approximate location in the margin. Finally, please place the tables after the figure legends in the manuscript.
