

# HANDBOOK OF QUANTITATIVE SUPPLY CHAIN ANALYSIS: Modeling in the E-Business Era

Edited by  
DAVID SIMCHI-LEVI  
Massachusetts Institute of Technology

S. DAVID WU  
Lehigh University

ZUO-JUN (MAX) SHEN  
University of Florida

**Kluwer Academic Publishers**  
Boston/Dordrecht/London

# Contents

Chapter 1	
Supply Chain Analysis and E-Business: An Overview	1
<i>David Simchi-Levi, S. David Wu and Z. Max Shen</i>	
1. Introduction	1
2. Main Components of the Handbook	3
2.1 Emerging Paradigms for Supply Chain Analysis	3
2.2 Auctions and Bidding	4
2.3 Supply Chain Coordinations in E-Business	5
2.4 Multi-Channel Coordination	7
2.5 Network Design, IT, and Financial Services.	8
3. Conclusions	9
Acknowledgments	9
Part I Emerging Paradigms for Supply Chain Analysis	
Chapter 2	
Game Theory in Supply Chain Analysis	13
<i>Gérard P. Cachon and Serguei Netessine</i>	
1. Introduction	13
1.1 Scope and relation to the literature	14
2. Non-cooperative static games	14
2.1 Game setup	15
2.2 Best response functions and the equilibrium of the game	17
2.3 Existence of equilibrium	21
2.4 Uniqueness of equilibrium	29
2.5 Multiple equilibria	35
2.6 Comparative statics in games	36
3. Dynamic games	40
3.1 Sequential moves: Stackelberg equilibrium concept	40
3.2 Simultaneous moves: repeated and stochastic games	41
3.3 Differential games	45
4. Cooperative games	48
4.1 Games in characteristic form and the core of the game	49
4.2 Shapley value	50
4.3 Biform games	51
5. Signaling, Screening and Bayesian Games	52
5.1 Signaling Game	53
5.2 Screening	56
5.3 Bayesian games	57

6.	Summary and Opportunities	58
	References	59
Chapter 3		
	Supply Chain Intermediation: A Bargaining Theoretic Framework	67
	<i>S. David Wu</i>	
1.	Introduction	67
2.	Supply Chain Intermediation	70
3.	Supply Chain Intermediary Theory	73
3.1	The Basic Settings	73
3.2	Mechanism Design and the Revelation Principle	74
3.3	Models of Supply Chain Intermediation	76
4.	Bilateral Bargaining with Complete Information	77
4.1	Bilateral Bargaining to Divide the System Surplus	79
4.2	A Bilateral Supply-Chain Bargaining Model	81
4.3	The Subgame Perfect Equilibrium	82
4.4	Analysis of the Bargaining Game	85
4.5	Intermediary's Role in Price Setting, Searching, and Matching	87
5.	Bilateral Bargaining with Incomplete Information	89
5.1	The Basic Setting	90
5.2	The Direct Revelation Mechanism	92
6.	Multilateral Trade with Incomplete Information	97
6.1	Multilateral Trade with Vertical Integration	97
6.2	Multilateral Trade with Markets	101
7.	Related Work in the Supply Chain Literature and Research Opportunities	105
	References	112
Chapter 4		
	Decentralized Decision Making in Dynamic Technological Systems: The Principal-Agent Paradigm	117
	<i>Stefanos Zenios</i>	
1.	Background and Motivation	117
2.	The Static Principal-Agent Model	119
3.	The Dynamic Principal-Agent Model	121
3.1	The Principal's Problem	123
3.2	Step 1: The Static Problem.	125
3.3	Step 2: The Dynamic Problem.	126
4.	A Model with Multiple Agents	127
5.	A Production-Inventory System	129
6.	A Service Delivery System	133
7.	The Past and the Future	137
8.	Concluding Remarks	138
	Acknowledgments	138
	References	139
Part II Auctions and Bidding		
Chapter 5		
	Auctions, Bidding and Exchange Design	143

*Jayant Kalagnanam and David C. Parkes*

1.	Introduction	143
1.1	A framework for auctions	144
1.2	Outline	146
2.	Economic Considerations	146
2.1	Preliminaries	147
2.2	Mechanism Design	148
2.3	Competitive Equilibrium	157
2.4	Indirect Revelation Mechanisms	159
3.	Implementation Considerations	164
3.1	Bidding Languages	164
3.2	Winner-Determination Complexity	166
4.	Interactions between Computation and Incentives	179
4.1	Strategic Complexity	180
4.2	Communication Complexity	181
4.3	Valuation Complexity	182
4.4	Implementation Complexity	183
5.	Specific Market Mechanisms	186
5.1	Combinatorial Auctions	186
5.2	Multi-unit Auctions	189
5.3	Multiattribute Auctions	192
5.4	Procurement Reverse Auctions	194
5.5	Capacity constrained allocation mechanisms	196
5.6	Double Auctions and Exchanges	197
6.	Discussion	200
	References	204

## Chapter 6

Auctions and Pricing in E-Marketplaces	213
--	-----

*Wedad Elmaghraby*

1.	B2B E-Marketplaces	213
2.	Current State of Pricing in B2B Marketplaces	215
3.	Customizing Auctions - A Case Study of FreeMarkets	219
3.1	Auction Formats	221
3.2	Combating Collusion	224
4.	Bidder Support in Auctions - Manugistics' NetWORKS Target Pricing <sup>TM</sup>	227
5.	Future Directions for Research in Auction Theory	230
6.	Precision Pricing - Manugistics' Networks Precision Pricing	232
7.	Future Directions for Research in Price Discrimination	238
8.	Conclusion	240
	References	243

## Chapter 7

Design of Combinatorial Auctions	247
----------------------------------	-----

*Sven de Vries and Rakesh V. Vohra*

1.	Introduction	247
2.	Mechanism Design Perspective	249
3.	Optimal Auctions	250
4.	Efficient Auctions	254
4.1	The VCG Auction	255

5.	Implementing an Efficient Auction	257
5.1	Winner Determination	257
5.2	Supposed Problems with VCG	261
5.3	Ascending Implementations of VCG	264
5.4	Threshold and Collusion Problems	276
5.5	Other Ascending Auctions	277
5.6	Complexity of Communication	278
6.	Interdependent Values	278
7.	Two Examples	281
7.1	The German UMTS-Auction	281
7.2	Logistics Auctions	284
	References	287
Part III Supply Chain Coordinations in E-Business		
Chapter 8		
	The Marketing-Operations Interface	295
	<i>Sergio Chayet, Wallace J. Hopp and Xiaowei Xu</i>	
1.	Product Development	298
1.1	Conjoint Analysis For Concept Development	299
1.2	System Level and Detailed Design	301
1.3	Prototyping and Testing	304
1.4	Macro-Level Research	305
2.	Sales	306
2.1	Pricing	307
2.2	Lead Time Quoting	309
2.3	Quality Management	311
2.4	Product Variety	312
3.	Production/Delivery	313
4.	Service	316
4.1	Previous Research	316
4.2	Research Opportunities	317
5.	Conclusions	319
	References	322
Chapter 9		
	Coordination of Pricing and Inventory Decisions: A Survey and Classification	335
	<i>L. M. A. Chan, Z. J. Max Shen, David Simchi-Levi and Julie L. Swann</i>	
1.	Introduction	335
1.1	Motivation	335
1.2	Scope	336
1.3	Classification and Outline	338
2.	Single Period Models	340
3.	Multiple Period Models	343
3.1	Models to Explain Price Realizations	343
3.2	General Pricing and Production Models	344
3.3	Retail, Clearance, and Promotion	351
3.4	Fixed Pricing	358
4.	Extension Areas	359
4.1	Multiple Products, Classes, and Service levels	359
4.2	Capacity as a Decision	366

4.3	Supply Chain Coordination	367
4.4	Competition	369
4.5	Demand Learning and Information	373
5.	Industry	376
5.1	Dynamic Pricing Practice	376
5.2	Related Research	376
5.3	Price Discrimination in Practice	377
5.4	Potential problems with Dynamic Pricing	378
6.	Conclusions and Future Research	379
	References	382
Chapter 10		
	Collaborative Forecasting and its Impact on Supply Chain Performance	393
	<i>Yossi Aviv</i>	
1.	Notation and Preliminaries	402
2.	Common Approaches for Modeling Demand Uncertainty and Forecast Evolution in the Inventory Management Literature	404
2.1	Demand models with unknown parameters	404
2.2	A Markov-modulated demand process	406
2.3	A linear state-space model	407
3.	Common Types of Single-Location Inventory Control Policies	410
3.1	Dynamic models for inventory management	410
3.2	Heuristic policies	416
3.3	An adaptive replenishment policy for the linear state-space model	419
4.	Models for Decentralized Forecasting Processes	421
4.1	The orders generated by the retailer	422
4.2	Enriched information structures	425
4.3	Assessment of the benefits of information sharing	428
5.	An inventory model of collaborative forecasting	429
5.1	Installation-based inventory systems	430
5.2	Echelon-based inventory systems	432
6.	Cost analysis	435
6.1	Cost assessment	435
6.2	Policy coordination in the supply chain	437
6.3	Decoupled two-level inventory systems	439
6.4	Results from the study of CF	440
7.	Summary	442
	References	443
Chapter 11		
	Available to Promise	447
	<i>Michael O. Ball, Chien-Yu Chen and Zhen-Ying Zhao</i>	
1.	Introduction	447
1.1	Push-Pull Framework	448
1.2	Available to Promise (ATP)	449
2.	Business Examples	449
2.1	Overview of Conventional ATP	449
2.2	Toshiba Electronic Product ATP System	451
2.3	Dell Two-stage Order Promising Practice	452
2.4	Maxtor ATP Execution for Hard Disk Drive	453
2.5	ATP Functionality in Commercial Software	454
3.	ATP Modelling Issues	455

3.1	ATP Implementation Dimensions	455
3.2	Factors Affecting ATP Implementations	456
3.3	Push vs. Pull ATP Models	459
4.	Push-Based ATP Models	461
4.1	Push ATP Rules and Policy Analysis	462
4.2	Deterministic Optimization-Based Push ATP Models	463
4.3	Stochastic Push ATP Models	467
5.	Pull-Based ATP Models	469
5.1	Pull-Based ATP Models for an MTS Production Environment	470
5.2	Real Time Order Promising and Scheduling	471
5.3	Optimization-Based Batch ATP Models	473
5.4	Experimental Implementation	477
6.	Conclusions	480
	Acknowledgments	480
	References	481
Chapter 12		
	Due Date Management Policies	485
	<i>Pinar Keskinocak and Sridhar Tayur</i>	
1.	Characteristics of a Due Date Management Problem	487
1.1	Due Date Management Decisions	487
1.2	Dimensions of a Due Date Management Problem	489
1.3	Objectives of Due Date Management	490
1.4	Solution Approaches for Due Date Management Problems	494
2.	Scheduling Policies in Due Date Management	494
3.	Offline Models for Due Date Management	499
3.1	Equal Order Arrival Times	500
3.2	Distinct Order Arrival Times	501
4.	Online Models for Due Date Management	503
4.1	Due-Date Setting Rules	506
4.2	Choosing the Parameters of Due Date Rules	520
4.3	Mathematical Models for Setting Due Dates	521
5.	Due Date Management with Service Constraints	523
6.	Due Date Management with Price and Order Selection Decisions	530
6.1	Due Date Management with Order Selection Decisions (DDM-OS)	531
6.2	Due Date Management with Price and Order Selection Decisions (DDM-P)	536
7.	Conclusions and Future Research Directions	542
	References	547
Part IV Multi-Channel Coordination		
Chapter 13		
	Modeling Conflict and Coordination in Multi-channel Distribution Systems: A Review	557
	<i>Andy A. Tsay and Narendra Agrawal</i>	
1.	Introduction	557
1.1	Business Setting	557

1.2	Scope of Discussion	559
1.3	Contribution	561
2.	Related Literature	562
2.1	Descriptive research	562
2.2	Analytical research	564
3.	Analytical Research on Conflict and Coordination in Multi-Channel Systems With Both Manufacturer-Owned And Inter-mediated Channels	571
3.1	Manufacturer-owned channel is direct sales	574
3.2	Manufacturer-owned channel contains physical stores	582
3.3	Discussion	585
4.	Research Opportunities	586
4.1	Representing channel characteristics	586
4.2	Evaluating distribution strategies	594
4.3	Concluding remarks	595
	Acknowledgments	595
	References	597
Chapter 14		
	Supply chain structures on the Internet and the role of marketing-operations interaction	607
	<i>Serguei Netessine and Nils Rudi</i>	
1.	Introduction	607
2.	Literature survey	611
3.	Notation and modeling assumptions	614
4.	Supply chain models without coordination	616
4.1	Model I - vertically integrated supply chain	616
4.2	Model T - traditional supply chain	618
4.3	Model D - drop-shipping	619
4.4	Comparative analysis of the stationary policies	625
5.	Supply chain coordination	629
6.	Numerical experiments	632
7.	Conclusions and discussion	636
	References	639
Chapter 15		
	Coordinating Traditional and Internet Supply Chains	643
	<i>Kyle D. Cattani, Wendell G. Gilland and Jayashankar M. Swaminathan</i>	
1.	Introduction	643
1.1	Overview of Research	644
1.2	Procurement	644
1.3	Pricing	646
1.4	Distribution / Fulfillment	647
2.	Procurement	648
2.1	Coordinating Traditional and Internet Procurement	648
2.2	Formation of Consortia	655
3.	Pricing	656
3.1	Independent Competition	656
3.2	Bricks and Clicks	660
3.3	Forward Integration	665
3.4	Full Integration	668
4.	Distribution / Fulfillment	668

4.1	Direct channel as outlet	669
4.2	Direct channel as Service buffer	671
5.	Conclusion	674
	References	675
Part V Network Design, IT, and Financial Services		
Chapter 16		
	Using a Structural Equations Modeling Approach to Design and Monitor Strategic International Facility Networks	681
	<i>Panos Kouvelis and Charles L. Munson</i>	
1.	Introduction	681
1.1	A conceptual framework to Classify Global Network Structures	681
1.2	Literature Review	682
1.3	Research Contributions	685
2.	Structural Equations Model	686
2.1	Problem Statement	686
2.2	Motivation for the Structural Equations Modeling Approach	686
2.3	Framework Measures (Independent Variables)	687
2.4	Proxies for the Global Network Structure Dimensions (Dependent Variables)	689
2.5	Model Development	689
2.6	Model Validation	695
2.7	Other Products	696
3.	Government Incentives: Tax Holidays and Subsidized Loans	696
4.	Conclusion	701
	Acknowledgments	702
	Appendix: MIP Model for Facility Location	702
	References	708
Chapter 17		
	Integrated Production and Distribution Operations: Taxonomy, Models, and Review	711
	<i>Zhi-Long Chen</i>	
1.	Introduction	711
2.	Model Classification	713
3.	Production - Transportation Problems	715
4.	Joint Lot Sizing and Finished Product Delivery Problems	717
5.	Joint Raw Material Delivery and Lot Sizing Problems	720
6.	General Tactical	721
7.	Joint Job Processing and Finished Job Delivery Problems	729
8.	Directions for Future Research	732
	Acknowledgments	734
	References	735
Chapter 18		
	Next Generation ERP Systems: Scalable and Decentralized Paradigms	747
	<i>Paul M. Griffin and Christina R. Scherrer</i>	
1.	Introduction	747

<i>Contents</i>	xiii
2. A Brief History	749
3. Current ERP Functionality	751
4. Implementation Issues	755
5. Scalability and ERP	759
5.1 New Developments in Enterprise Scalability	759
5.2 Standards in ERP	763
6. Decentralized ERP	766
6.1 <i>e</i> -Market Intermediaries	767
6.2 Outsourced ERP Systems	770
7. Current Enterprise Issues: ERP II and ECM	772
8. Conclusions	775
References	778
Chapter 19	
Delivering <i>e</i> -banking services: An emerging internet business model and a case study	783
<i>Andreas C. Soteriou and Stavros A. Zenios</i>	
1. Introduction	783
2. The changing landscape of demand for financial services	785
3. The changing landscape of supply of financial services	787
4. An Emerging <i>e</i> -Banking Model	790
5. The design of a web-based personal asset allocation system	794
5.1 The integrated decision support system	796
5.2 Business plan for the deployment of the system	797
5.3 Bringing it altogether: Lessons from the implementa- tion of the system	800
6. Concluding Remarks	802
References	803
Index	805
