1. Verify that Portfolio Safeguard (PSG) is installed at your PC. You can request a [Free Academic License](#) of PSG at [AORDA](#) website.

2. Verify that MATLAB is installed at your computer.

3. Look through (if needed) instructions for [PSG Toolbox in MATLAB](#).

4. Download data and Unzip mat file for a problem.

5. Start PSG Toolbox in MATLAB.

6. Use "Load from MAT" in Data menu to upload *.mat file for the problem.

7. Run problem in the PSG Toolbox.
