

1. Verify that Portfolio Safeguard (PSG) is installed at your PC. You can request a [Free Academic License](#) of PSG at [AORDA](#) website.
2. Verify that R ($\geq 3.2.3$) is installed at your computer.
3. Look through (if needed) instructions for [Main Objects of PSG R](#)
4. Download data and Unzip RData file for a problem.
5. Use R Code to run the problem in R.
