

1. Verify that Portfolio Safeguard (PSG) is installed at your PC. You can request a [Free Academic License](#) of PSG at [AORDA](#) website.
2. Look through (if needed) instructions for [PSG in Run-File environment](#).
3. Download data and Unzip mat file for a problem.
4. Start PSG Run-File application (Run-File_x64.exe in ...\\PSG directory) and run the problem.
